CONSULTANT, HEALTH ECONOMIC MODELLING

Location: Cambridge office/Hybrid
Salary: Competitive

Due to ongoing success and internal growth, we are looking for a Consultant to join our Economic Modelling Group.
Cogentia is a specialist consulting company focused on Health Economics and Market Access within the Life Sciences industry, an area that is of increasing importance to pharmaceutical, biotech and medtech companies and to National health systems around the world where their products are used.
Cogentia works with a range of clients, across many different therapy areas and technologies. Our Economic Modelling Group is a key department within the business, developing economic evaluations for Health Technology Appraisals, early product value assessments and peer-reviewed publications.

Responsibilities

As a Consultant (Health Economic Modelling), you will

- Conceptualise and implement economic models
- Adapt core models to specific markets
- Undertake quality control (QC) of economic models
- Identify, extract and synthesise a range of evidence to support model development
- Interpret clinical and economic data to inform model inputs and assumptions, and to explain results in the context of the project
- Contribute to high-quality project deliverables including reports, models and presentations
- Take ownership of the projects and contribute to managing project teams, ensuring clients receive high-quality deliverables in a timely and cost-effective manner
- Support and mentor less experienced team members.
- Contribute to business development. While this is a primary responsibility of the Directors, our consultants play a key role in business development, especially in:
  - Identifying opportunities for follow-on work and new leads
  - Supporting the development of intellectual property for use on future engagements
  - Supporting the development of proposals
  - Building strong relationships with clients, payers, healthcare professionals, key opinion leaders

About you

Essential

- Proven hands-on experience in health economic modelling
- A PhD or MSc in health economics or a life sciences subject (e.g. medicine, physiology, biochemistry, pharmacology, pharmacy), or equivalent experience

Copyright © 2021

- Experience of designing and building health economics models (built at least three cost-utility models in Excel with minimal guidance)
- Experience preparing data for economic models using Stata, R or SAS
- Strong project management skills, with a proven ability to work to strict deadlines
- A proactive, resourceful approach: taking on new challenges and identifying opportunities for follow-on work
- Strong analytical skills, with the ability to interpret complex data and communicate findings clearly
- Excellent written and verbal English, and strong interpersonal skills, including effective listening and negotiation
- Commitment to developing yourself and others
- Eligibility to work in the UK

Desirable

- Experience developing submissions to national health technology assessment (HTA) bodies (e.g. NICE)
- Additional language ability

What we offer

- A competitive salary and benefits package
- 25 days annual leave plus the standard public holidays
- A flexible hybrid working policy that supports a healthy work-life balance
- A great central Cambridge location and a friendly and supportive work environment

How to apply

To apply, please email your CV along with a covering letter to recruitment@cogentia.co.uk, quoting "Consultant, Health Economic Modelling" in the subject line.

Cogentia is an equal opportunities employer. We welcome applications from all suitably qualified candidates and will make reasonable adjustments during the recruitment process on request.
